- Microsoft Office

WORK EXPERIENCE

RED @ Vanguard

2024- PRESENT

Creative Technologist

- Optimized Adobe Workfront workflows, reducing time-to-market by 23% through process redesign and automation. Supported agency users by designing and implementing custom workflows that improved operational efficiency and team productivity. Partnered with IT and business stakeholders to gather requirements and deliver cross-platform integrations. Led cross-functional integration and ongoing optimization of Workfront across teams. Developed RED Ink, a custom AI content-generation application trained on approved assets, brand guidelines, style guides, and compliance frameworks. Enabled automated creation of articles, emails, and social content directly from creative briefs, reducing content production time from ~1 day to 5 minutes. Built an AI-powered resource management system that: Monitors Workfront projects every 5 minutes Analyzes timelines, portfolios, and workload distribution Recommends top 3 candidates per role based on availability and historical performance (trained on 1 year of project data) Automated resource allocation, freeing up ~0.5 FTE capacity

RED @ Vanguard

2021- 2024

Creative Agency Manager

- Lead and optimize creative processes for digital, video, UX, interactive, print, and presentation materials.
- Manage end-to-end project lifecycles, ensuring on-time and high-quality creative deliverables across multiple channels.
- Design and implement workflow efficiencies using Adobe Workfront, reducing project bottlenecks and improving team productivity.
- Oversee creative asset development, collaborating with internal stakeholders to align branding and business objectives.
- Serve as a Workfront administrator and subject matter expert, leading transition efforts from Wrike to Workfront.

Hard Skills:

- Project Management
- Stakeholder Alignment
- Agile Project Management
- Client Relations
- AI-driven Workflow Automation
- Image Production & Quality Review
